**Pere Ubu (Moon Unit) Live Dates**
07 Dec: Ramsgate Music Hall, Ramsgate, UK
08 Dec: Théâtre Municipal Berthelot, Montreuil, France

It sounds like a call to arms, a rallying cry from a tinny transistor radio, the grind and rhythm of industrial Ohio clumping into the back of your head with enough spacey synth rising up through its esophagus… bubbling up like some acid explosion.

How come Pere Ubu created such a noise in 1976? Recorded in just three hours at the Suma studio, it was their reaction to punk rock's simplicity; a complexity that at 2.19 sounds like rayguns are primed and by 2.28 the power gets cut by 'nuclear destruction'.

*"Belying the frightening soundscape was a definite, playful humor, both in the wordplay and in the specific complaints."* **All Music**

It's a bleak and morbid worldview, the title taken from the Sherlock Holmes' book 'The Final Problem', that ensured the new wave and the cold war would collide in post-punk acrimony, listed on Rate Your Music as "anxious,

misanthropic, futuristic, noisy, suicide, rebellious, alienation".

This limited edition pressing recreates their second self-released Hearpen single and sounds just as revolutionary and inspirational many moons later... they don't need a cure, welcome to the mainstream.
